## SECOND SEMESTER PRICES

of our weekly publication

## THE SCIENCE NEWS LETTER

We offer to the science student our personal publication, the Weekly Science News-Letter, at a price in keeping with the school budget.

Our magazine is now in its seventh year—and its third in printed form. In these years, so important from the standpoint of scientific achievement, we have reported every outstanding scientific milestone—every invention and discovery worthy of the name.

The clippable feature enables the student to remove and file each original editorial without disturbing any other original editorial content—thus facilitating the making of the class-room notebook.

As to time—the most necessary item in this rushing world of ours today—we can give accurate, authoritative data to our readers **IN LESS THAN TWO WEEKS AFTER THE EVENTS RECORDED ACTUALLY OCCUR!** And this is less, by months and years, than can be accomplished by the publisher of scientific textbooks. Thus the weekly Science News Letter proves a valuable supplement to the classroom.

Special semester prices, when ten or more copies are sent to the same address, are extremely low—the class may be supplied individually for less than a dollar for each subscriber, from February 1 until the middle of June. Every science teacher or student should take advantage of this special offer.

Group Subscriptions of 10 or more to the same address, 90 cents each.

Individuals wishing to subscribe to the Science News-Letter for the second semester of the school year may do so at the rate of \$1.50 for the period February 1 to June 15.

Regular price for a year's subscription, \$5.00.

SCIENCE SERVICE,  
2169 B Street,  
Washington, D. C.

Send me ..... weekly Science News-Letters that I may take advantage of your Second Semester prices. Let the bill follow later.
