teach all the tables from 2's through 12's as easily as the words of a song!

Help your child do better in arithmetic—especially in the New Math—by getting him these new multiplication records. Modern Math teachers insist on children *memorizing* their tables. Now even children of pre-school age can easily learn all the tables from 2's through 12's *simply by playing these records*.

No urging needed from parents. Children love these records. Each table has its own catchy tune and jingles. And the man on the record *quizzes* your child so the tables stick in his memory. He *must* know his tables to learn long division, fractions and decimals.
