# Everybody's making money selling microcomputers. Somebody's going to make money servicing them.

## Now NRI Trains You At Home To Make Money Servicing, Repairing, and Programming Personal and Small Business Computers.

Seems like every time you turn around, somebody comes along with a new computer for home or business use. And what's made it all possible is the amazing micro-processor, the tiny little chip that's a computer in itself.

Using this new technology, the industry is offering compact, affordable computers that handle things like payrolls, billing, inventory, and other jobs for business of every size...perform household functions including budgeting, environmental systems control, indexing recipes. And thousands of hobbyists are already owners, experimenting and developing their own programs.

### Growing Demand for Computer Technicians

This is only one of the growth factors influencing the increasing opportunities for qualified computer technicians. The U.S. Department of Labor projects over a 600% increase in job opportunities for the decade; most of them *new* jobs created by the expanding world of the computer.

### Learn At Home to Service Any Computer

NRI can train you for this exciting, rewarding field. Train you at home to service not only microcomputers, but word processors and data terminals, too. Train you at your convenience, with clearly written "bite-size" lessons that you do evenings or weekends, without going to classes or quitting your present job.

Your training is built around the latest model of the world's most popular computer. It's the amazing TRS-80™ Model 4, now with disk drive and the capabilities and features to perform a host of personal and business functions. No other small computer has so much software available for it, no other is used and relied on by so many people. And it's yours to keep for personal and business use.

You get plenty of practical experience. Under NRI's carefully planned training, you even install a *disk drive* verifying its operation at each step. Using the NRI Discovery Lab® that also comes as part of your course, you build and study circuits ranging from the simplest to the most (TRS-80 is a trademark of the Radio Shack division of Tandy Corp.)

advanced. You analyze and troubleshoot using the professional 4-function LCD digital multimeter you keep to use later in your work. Then you use the lab and meter to actually access the interior of your computer...build special circuits and write programs to control them. You "see" your computer at work and demonstrate its power.

### Same Training Available With Color Computer

NRI offers you the opportunity to train with the TRS-80 Color Computer as an alternative to the Model 4. The same technique for getting inside is enhanced by using the new NRI-developed Computer Access Card. Only NRI offers you a choice to fit your specific training needs.

### Become the Complete Computer Person

In addition to training in BASIC and advanced machine language, you gain hands-on experience in the operation and application of the latest computers for both business and personal jobs. You're trained to become the fully rounded, new breed of technician who can interface with the operational, programming, and service facets of all of today's computers. You're ready to take your place in the new electronics age.

### Other Opportunities

NRI has been giving ambitious people new electronic skills since 1914. Today's offerings also include TV/Audio/Video Systems servicing with training on our exclusive Heath/Zenith computer-programmable 25" diagonal color TV...Industrial Electronics...Design Technology...and other state-of-the-art courses.

### The Catalog is Free. The Training is Priceless.

Send the coupon for our 104-page catalog showing all courses with equipment and complete lesson plans. There's no obligation other than to yourself. See how NRI can help you take advantage of the exciting job and earning opportunities in the exploding field of microcomputers. If coupon has been removed, please write to NRI Schools, 3939 Wisconsin Ave., Washington, D.C. 20016

The Library of Science invites you to explore 5 great ideas in...

# THE FRONTIERS OF KNOWLEDGE

A handsome, 5-volume collection that surveys 5 scientific disciplines and their bold new ideas that are changing the world we live in.

A combined \$69.80 value is yours for only **\$295** when you join the Library of Science.

You simply agree to buy 3 more books—at handsome discounts—within the next 12 months.

### Investigate Evolution in...

#### LIFE ON EARTH

by David Attenborough. In an expanded version of his highly acclaimed TV documentary series, the author takes you on a 3-year, round-the-world odyssey, camera in hand, as he examines the adaptive behaviors of living species for first-hand clues to evolution. 317 pages, brilliantly written, and with 120 color plates, *LIFE ON EARTH* has won praise from reviewers everywhere.

### Learn Problem Solving with...

#### MATHEMATICAL DISCOVERY

by George Polya. A revised and updated edition of the pioneering text in which Stanford mathematics professor George Polya offers new "heuristic" methodologies for problem solving in the pre-calculus curriculum.

### Explore Cognitive Science in...

#### THE UNIVERSE WITHIN

by Morton Hunt. A recent best-seller, *THE UNIVERSE WITHIN* surveys the most recent findings on how the human brain remembers, analyzes, and solves problems. The reader is challenged with dozens of problems and puzzles that illustrate what makes the human mind different from—and superior to—a computer.

### Discover the new science of

#### Chronosophy in... VOICES OF TIME

Revised Edition by J.T. Fraser. A remarkable and massive (715pp), interdisciplinary investigation of the fourth dimension by 26 eminent scholars offering their different perspectives on Time: in Relativity, in Quantum Physics, in Evolution, in Music, and other areas.

### Journey into the Expanding

#### Universe with... THE RED LIMIT

Revised Edition by Timothy Ferris. An absorbing account of the historic discoveries of modern astronomy: the Red Shift... quasars... binary stars ...

pulsars... black holes... recent cosmological theories, and more. Winner of the American Institute of Physics Prize for Science Writing. Offered here in an updated edition with 100 new photos.

### Membership Benefits

In addition to getting the Frontiers of Knowledge for only \$2.95 when you join, you keep saving substantially on the books you buy. • Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings up to 70% off publishers' prices. • At 3-4 week intervals (16 times per year) you will receive the Book Club News, describing the coming Main Selection and Alternate Selections, together with a dated reply card. • If you want the Main Selection, do nothing and it will be sent to you automatically. • If you prefer another selection, or no book at all, simply indicate your choice on the card, and return it by the date specified. • You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

### About the Club...

The Library of Science is the nation's oldest and most respected science book club. Dedicated to serving both professionals and serious avocationists, it surveys the entire field of published sources on scientific subjects to make the very finest works available to club members at substantial savings.

2-AY3

### The Library of Science Riverside, New Jersey 08075

Please accept my application for trial membership and send me the FRONTIERS OF KNOWLEDGE (00554), billing me only \$2.95. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three books. A shipping and handling charge is added to all shipments.

**No-Risk Guarantee:** If you are not satisfied—for any reason—you may return the FRONTIERS OF KNOWLEDGE within 10 days and your membership will be canceled and you will owe nothing.
