

Models Can Be Fitted with Small Motors for Powered Flight

CLASSIC PAPER PLANES

10 Classic Airplanes to Build and Fly
Each with Die-Cut Parts and Full Instructions

**MICHAEL JOHNSON
AND ALAN AUSTIN**

In aviation design, the years between the 1914–18 and 1939–45 wars were an extraordinary period, not only for the development of aircraft in general, but also for the wide variety of fascinating designs produced, from the lightest of aeroplanes with tiny engines of very little horsepower, to huge multi-engined heavy bombers. Alongside this multiplicity of designs grew a generation of great individual pilots. *Classic Paper Planes* features 10 amazingly realistic paper models of classic aircraft designs from WWI and WWII. Each is built almost exactly to scale and will actually fly! Nine of the ten models can be modified and fitted with small motors for powered flight. Each model comes with a full descriptive historical text, photographs of the real-life plane, and detailed assembly drawings. In addition, all plane parts are printed in full color and are die cut for easy removal. All major fold lines are scored for easy folding. Just follow the instructions for assembling, trimming and flying and enjoy hours of delight with these authentic and colorful models.
