

Do You Like To Read?

RHROUGH the Reading with a Purpose courses distinguished men and women point the way to a better understanding and appreciation of science, art, literature, history, sociology, philosophy, etc.

A series of some forty booklets have appeared on as many subjects.

Each comprises an introduction to its subject, discusses the relation of the subject to every day life and points out what there is of pleasure and profit to be found in its study. Half a dozen books which comprise a systematic course of reading are re-

viewed in a way to help the reader understand and enjoy them.

More than a half million of these courses are in use. Planned originally for the individual they have come to be used as study outlines by industries, schools, colleges, study clubs and other groups. Some of the titles follow:
