• CIRCULAR SLIDE RULES •

No. 1028

No. 1028 "ATLAS" SLIDE RULE
Made of white enameled aluminum. Diameter $8\frac{1}{2}$ ", engine divided. The outer Scale is the equivalent of a straight 25" long slide rule. The next scale is divided in equal divisions and is used for solving a few types of problems and for quickly locating any factor on the spiral. The third scale is a spiral having 30 coils and equivalent to a straight slide rule 60 feet long. The "ATLAS" is invaluable for many types of work, as it replaces the larger and more cumbersome laboratory slide rule.
The "ATLAS" gives the Sines, Cosines, Tangents and Cotangents of all angles from 0 to 90° and reads to 1'. It gives the decimal equivalents of fractions to six figures. **- 12.95**

No. 1026

No. 1026 "BINARY" SLIDE RULE
Made of white enameled aluminum. Diameter $8\frac{1}{2}$ ", engine divided. It is equivalent of a 16-inch straight Log-Log rule. The C, C1, A, K and Log Scales are divided as closely as a 20 inch straight slide rule. The C Scale is over 25 inches long. The Spiral Log-Log Scale has four coils and extends from 1.0015 to 1,000,000.
One setting of the BINARY will give the drill size for any size tap with any thread, either V. or U.S.F. The drill size can be read in 64ths, .001", M.M., and lettered or numbered drill. The BINARY gives the Sines, Cosines, Tangents, Cotangents of all angles from 0 to 90° and reads to 1'. It gives the decimal equivalents of fractions to six figures. **- 9.95**

No. 1024 "MIDGET" SLIDE RULE
Made of white enameled aluminum. Diameter 4". Has eight Scales. C-Scale, C1, Addition and Subtraction Scale, Square Root, Log-Log, Binary, Fraction and Thread Scales, which can be used in combination to solve complicated problems. Solves any difficulties in multiplication, division, addition, subtraction and proportion and gives all possible roots and powers. **- 3.95**

No. 1022 "ALLEGHENY" SLIDE RULE
Made of durable laminated vinylite. Diameter 4". Has AB, CD, C1, K and L Scales. Can be used for multiplication, division, proportions, finding squares or square roots, cubes or cube roots, reciprocals and logarithms. Length of CD Scale is 10.8 inches long. On reverse side is a temperature conversion table, a decimal equivalent chart and a 360° protractor. **- 1.95**

ELLISOGRAPH
No. 750—OMICRON MODEL 17
Infinite varieties of Ellipses can be made easily, has a capacity of over 12 inches major axis and produces mathematically true ellipses with ease, speed and precision. Within its capacity all sizes, shapes and projections of ellipses may be drawn. Either pencil, inking pen or scribe needle may be inserted into the head. The most notable feature of this instrument is a linkage system which moves the cross guide pin on a straight line, thus eliminating all play and friction usually connected with straight line slides. This linkage produces not only accuracy but also unusual ease of operation. **- 14.95**
